

Corporation of the Town of Minto

**Request For Tender
(5172-26)
Rehabilitation of Young Street Bridge
Harriston, Ontario**

**ADDENDUM NO. 2
(Issued March 25, 2026)**

This Addendum shall form part of the Request for Tender (RFT) Documents. The Proponent shall sign and seal this Addendum and submit it as part of their proposal documents acknowledging receipt and understanding of the addendum. It will be assumed by the Owner that all of these provisions are included in the tender price.

Questions/Clarifications:

Question: *Can we use temporary structures in the water before the in-water timing window? (ie concrete blocks to support a demolition deck or scaffolds to work under the bridge)*

Clarification: MVCA response, "As long as the structures are not blocking the entirety of the river (so that wildlife can still pass through) and are not cause for major habitat disturbance, that should be fine."

Except as to the extent that they are amended by the foregoing, all the terms and conditions of the Proponent shall remain in full effect.
